16. **Insurance.**—(*a*) Parcels and goods can be insured against total loss and against damage in transit at a rate of 1 per cent. on the declared value, subject to a minimum of Rs. 3 per consignment. 17. **Notice of arrival.**—The Ropeway does not undertake to serve notice of arrival of parcels or goods on consignees or their agents, and non-receipt of such notice will not entitle consignees to exemption from wharfage charges, when parcels or goods are not taken delivery of within the free time allowed. Post Card notices of arrival will, however, without prejudice to the above, be sent, whenever possible, by Station Masters to consignees.

18. **Wharfage.**—All parcels or goods must be removed from the Company's premises within 48 hours from midnight of the date of arrival. In the case of commodities liable to lose weight in transit the correct weight chargeable is that of the booking station, unless it can be shewn that the weight entered on the invoice is incorrect.

20. **Partial delivery of consignments.**—A consignee must take delivery of parcels or goods, forming part of a consignment, whenever they are available for delivery, notwithstanding the fact that the remainder of the consignment is short or damaged or has not arrived at destination or is otherwise not available for delivery. If a consignee does not take delivery of such parcels or goods, forming part of a consignment, as are available for delivery, they will be subject to the usual wharfage charges, if not removed within the free time allowed for removal.

21. **Disfigured Railway receipts.**—Railway receipts should on no account be disfigured or mutilated, as they will not be accepted in an imperfect state.

22. **Delivery when Railway receipt is lost.**—When a Railway receipt has been lost, mislaid, or is for other reasons not forthcoming, the Company reserves the right to demand an indemnity bond, before giving delivery of the articles concerned.

23. **Haulage charge on missent goods.**—When a consignment is overcarried or missent from a railway to a station on the Ropeway, the haulage charge over the Ropeway for returning the consignment, either to the sending railway or to the correct destination, as the case may be, will be two-thirds of the total freight for the upward and downward journeys as per Ropeway rates. Such consignments will in all circumstances be re-booked under "To-pay" invoices.

24. **Re-booking.**—Whenever parcels or goods, lying undelivered, are required to be re-consigned to another station or to be sent back to the original forwarding station, the consignor or the consignee (as the case may be) will be required to pay the charges due for the original consignment as well as the charges for the re-booking.

25. **Time limit of claims for refund or compensation.**—No person shall be entitled to a refund of an overcharge in respect of animals or goods carried by an aerial ropeway for public traffic or to compensation for the loss, destruction or deterioration of animals or goods delivered to be so carried, unless his claim to the refund or compensation has been preferred in writing by him or on his behalf to the promoter within six months from the date of the delivery of the animals or goods for carriage by the Ropeway (Chapter V, section 39, of the Bengal Aerial Ropeway Act, 1923).

26. **Offensive goods.**—The following articles are under the Indian Railways Act, IX of 1890, declared to be offensive goods:—

No. D.-7293.—The following statement is published for general information:—

A statement by His Excellency the Governor General of the reasons which have moved him in exercise of the powers conferred upon him by section 72 of the Government of India Act to make and promulgate an Ordinance to make further provision against associations dangerous to the public peace under the title of the Unlawful Association Ordinance, 1930.

H. W. EMERSON,

Secy. to the Govt. of India.

STATEMENT.

The civil disobedience movement has now been in progress for nearly six months. During that period its authors and supporters have done their utmost to subvert the Government as by law established and to propagate a spirit of defiance to constituted authority. They have incited ignorant and credulous people to open and organized breaches of the law and have instigated them to refuse the payment of public dues. They have attempted to undermine the loyalty of the army and the police, and have been the cause, directly or indirectly, of numerous outbreaks of violence. Its leaders have deliberately rejected the way of constitutional representation which lay open to them and have expressed their determination to continue their lawless actions to the utmost of their ability. The movement has already been responsible for much loss of life and property and has inflicted grave financial injury on many thousands of innocent persons, the vast majority of whom are Indians, and have been forced against their will to submit to the methods of coercion and intimidation employed. In view of the declared intention of the Congress to cause still greater damage and suffering to the public, I have considered it my duty to take such further powers as, in the opinion of my Government, will assist in checking the activities of the various organizations, through which effect is being given to the mischievous programme of the civil disobedience movement and other subversive movements.

2. It has been represented to me and my Government that the provisions of the Indian Criminal Law Amendment Act (Act No. XIV of 1908) are defective in so far as they do not enable possession to be taken of buildings and other property used for the purposes of an association that has been declared to be unlawful under the Act. In some parts of the country, and more particularly in the districts of Gujerat, associations have established their headquarters in towns and villages from which the supporters of the civil disobedience movement carry on their pernicious activities, and seek to persuade the ignorant to defy the law and to refuse the payment of Government dues. In these circumstances I have thought it right to promulgate an Ordinance which will enable Local Governments to take effective measures for the occupation of immoveable property and for the forfeiture in certain conditions of moveable property, used for the purposes of any association declared to be unlawful under the Criminal Law Amendment Act.

3. It is not my desire or that of my Government, in so far as this may be avoided without detriment to the public and general interests which it is the purpose of the Ordinance to protect, that unnecessary loss should be caused to individuals who may have disposed of their property to organizations connected with the civil disobedience and other subversive movements and are not themselves supporters of these movements. With this object in view, I have caused to be issued to Local Governments executive instructions which provide for the grant, as a matter of grace, of reasonable compensation to any person who has suffered loss from the occupation or forfeiture of his property, and in regard to whom there is satisfactory ground for the belief that he has not given direct or indirect support to the movement with which the unlawful association is connected. I have further requested Local Governments to consider with sympathy the return to third parties of

property occupied or attached under the Ordinance, provided that it is not required for the purposes of Government, and that the third party concerned gives assurances to the satisfaction of the Local Government in regard to its future use. I desire, however, to make it clear that these instructions primarily relate to associations which are now unlawful or are declared to be unlawful immediately after the promulgation of this Ordinance, and will not ordinarily extend to the case of property used for the purposes of any association that may thereafter be declared unlawful. All those whom it may concern should therefore take due warning against the lease or other disposition of property to any association or any person connected therewith, whose present or future activities may render the association liable to be declared unlawful.

I greatly deplore the necessity by which I have been constrained to make and promulgate this Ordinance and other cognate measures of emergency. But I am persuaded that, if the force of public opinion, which is to an increasing extent being directed against the grave injury which the civil disobedience movement is causing to the country, is exerted yet more effectively to resist its activities and to demand of those responsible for it that it shall be ended; and if public opinion is supported in this resolution by the action and conduct of individual citizens, each in his respective sphere or interest, influence and responsibility, there will be a speedy restoration of such conditions of order and tranquillity as may enable me to regard these measures as no longer necessary.

IRWIN,

Viceroy and Governor General.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 2nd October 1930.

First Forecast of the Winter Rice Crop of Bengal, 1930-31.

(NOTE.—On an average of the five years ending 1928-29, the area under winter rice in Bengal has represented some 17·6 per cent. of the total area under rice in British India.)

Character of the season.—Ante-monsoon showers were sufficient for the preparatory tillage and for the sowings of the broadcasted paddy in Eastern Bengal districts. Sowings of winter paddy in seed-beds were carried on under favourable conditions. The rainfall in June and July was insufficient especially in parts of East and North Bengal, where the progress of transplantation was slow. Good showers facilitated transplantation in West Bengal, where more area was brought under cultivation this year. Seasonable rainfall in August helped the operation generally and satisfactory progress was made. On the whole, the crop is expected to be good in West and in parts of East Bengal and fair elsewhere.

Acreage.—According to the figures returned by the District Officers the total area under winter rice is 14,768, 300 acres as compared with 14,582, 700 and 14,793, 700 acres in the corresponding and final forecasts of last year.

Outturn.—From the summary of the district returns appended it will be seen that Bankura reports more than a normal crop, five districts expect a normal crop, nineteen districts report a crop varying from 75 to 96 and only two districts below 70 per cent. of the normal.

According to the above estimates the provincial outturn works up to 86 per cent. as against 85 and 95 per cent. of the normal estimated, respectively, in the first and final forecasts of last year. In my opinion the present prospects indicate not less than 100 per cent. of the normal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 2nd October 1930.

Preliminary Forecast of the Bhadoi Crops of Bengal, 1930-31.

(NOTE.—On an average of the five years ending 1928-29, the area under autumn rice in Bengal has represented some 6·1 per cent. of the total area under rice in British India.)

Character of the season.—The rainfall in February was defective while in March it was in excess. The preparatory tillage for the crops was carried on under favourable conditions on the whole. During April and May sowing operations continued favourably in the lowland tracts of East and North Bengal with the result that more area was brought under cultivation this year. In West Bengal, on the other hand, insufficient rainfall hampered sowings to a certain extent. Moderate showers in the following month proved favourable for the growth and development of the crops especially in East and North Bengal. The season, on the whole, has been a favourable one for the crops especially for autumn rice this year.

Acreage.—The total acreage sown with the different *bhadoi* crops this year is reported to be 5,830,000 acres as against 5,821,600 and 5,815,100 acres, respectively, in the corresponding and final forecasts of last year. Of this, the area under *autumn* rice is estimated at 5,067,300 acres as against 5,039,200 and 5,031,100 acres, respectively, in the corresponding and final forecasts of last year.

Outturn.—According to District Officers' estimates, the outturn of the different *bhadoi* crops for the Presidency works out at 80 per cent. of the normal this year as against 75 and 80 per cent., respectively, in the corresponding and final forecasts of last year.

The *autumn* rice is estimated to yield an outturn of 80 per cent. of the normal for the province this year as against the estimate of 74 and 80 per cent., respectively, in the corresponding and final forecasts of last year. In my opinion the outturn of autumn rice is an underestimate and that the crop will not fall short of 105 per cent. of the normal this year.

Director of Agriculture, Bengal.

Resolution on the Reports on Inland Emigration under the Assam Labour and Emigration Act, 1901 (VI of 1901), for the year ending 30th June 1930.

REVENUE DEPARTMENT.

Emigration.

DARJEELING, THE 27TH SEPTEMBER, 1930.

RESOLUTION—No. 1156T.R.

Read—

The Reports on Inland Emigration under the Assam Labour and Emigration Act, 1901 (VI of 1901), for the year ending 30th June 1930, submitted by the Superintendent of Emigration, Calcutta, and the District and Assistant Superintendents of Emigration.

There was a noticeable decrease in the number of emigrants despatched to the labour districts during the year under review. This was due chiefly to the temporary suspension of recruitment in consequence of heavy floods in Cachar and Sylhet resulting in many breaches on the Assam Bengal Railway.

2. Recruiting operations in Bengal were conducted, as in the previous year, in the districts of Bankura, Birbhum, Burdwan, Midnapore and Murshidabad. The number of garden sardars employed during the year was 263 (including 45 sardarnis) as against 604 in the previous year. All worked under the supervision of licensed local agents. The number of local agents' licenses was 15 as against 10 issued in the previous year. The total number of emigrants recruited in Bengal was 183 as compared with 993 in the preceding year. The largest number of recruits was from Birbhum, viz., 78. The total number of recruits from Bengal and other provinces embarking at Goalundo was 10,804 (including those recruited in the Bombay Presidency outside the Act) as compared with 19,565 in the preceding year.

3. The rest-houses for emigrants at Kharagpur, Asansol, Naihati and Goalundo, maintained by the Tea Districts Labour Association, were frequently inspected and found to be satisfactory in all respects.

4. Altogether 7 deaths occurred among the emigrants on transit, viz., 3 at Kharagpur, 1 at Asansol, 2 at Naihati and 1 at Goalundo. Out of the total number of emigrants who arrived from the different recruiting districts in and outside the Presidency of Bengal, 8 deserted, viz., 2 from Kharagpur and 6 from Naihati, and 5 were released, viz., 4 from Kharagpur and 1 from Asansol. There was no death or desertion amongst emigrants during their journeys by steamer from Goalundo or by railway from Chandpur to their final destination.

5. In connection with the transport of labour to Assam, receipts amounted to Rs. 809-15 as against Rs. 750 in the previous year, while the expenditure decreased from Rs. 9,341-8-6 to Rs. 9,085-6.

6. Lt.-Col. A. Denham White, I.M.S., held the office of Superintendent of Emigration, Calcutta, throughout the year. The thanks of the Governor in Council are due to him and the local officers for their assistance in the administration of the Act.

By order of the Governor in Council,

H. J. TWYNAM,

Secy to the Govt. of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 11th October 1930.

Second Forecast of the Cotton Crops of Bengal, 1930-31.

(NOTE.—On an average of the five years ending 1928-29, the area under the cotton crops in Bengal has represented some 0·2 per cent. of the total area under cotton in India.)

There are two crops, early and late. The "early" crop is chiefly grown in the Chittagong Hill Tracts and in the Tripura State and to a small extent in other districts. The "late" crop is grown in Bankura and Midnapore. As the late crop has not yet been sown, this forecast deals only with the early crop.

Character of the Season.—During the initial stages, weather was not favourable in Mymensingh and in the Tripura State, owing to insufficient rainfall in the former and to excess in the latter. Elsewhere the conditions were generally favourable. The present outlook, so far, is fair on the whole.

Sowings of late variety commenced in Midnapore under fair conditions.

Area sown.—The area sown with early cotton is reported to be 76,207 acres this year, as against 76,307 acres in the corresponding forecast of the last year. Of the late crop an area of 505 acres is reported to have been sown this year, as against 503 acres reported in the corresponding forecast of last year.

THE Bengal and Madras Service Family Pension Fund which is provisionally managed and assisted by Government has for its object the provision of monthly pensions for the maintenance of the widows and children of subscribers and is open, with certain exceptions, to all active and pensioned members of the Uncovenanted service of Government (except those serving under the Government of Bombay), and to Local Fund servants earning pensions from Government. Some of the special features of the fund are—(1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the premia paid, should the nominee predecease them after five years of admission. The second quinquennial valuation of the Fund has been completed by the Actuary to the Government of India, and his report discloses very favourable results. Camp Darjeeling, the 15th October 1930.

Second Forecast of the Sugarcane Crop of Bengal, 1930-31.

(NOTE.—On an average of the five years ending 1928-29, the area under sugarcane in Bengal has represented some 7·1 per cent. of the total area under sugarcane in British India.)

Character of the Season.—As indicated in the first forecast, the weather was generally favourable during the early period of growth although some damage was caused by heavy rains in places. Since then occasional good showers helped the development of the crop, with the result that the prospects have improved in most of the important districts of the province. On the whole a satisfactory crop is expected.

Area planted.—The total area planted with the crop for the province is reported to be 196,400 acres this year, against 197,500 and 197,600 acres reported, respectively, in the corresponding and final forecasts of last year.

Outturn.—According to the estimates of District Officers, the average outturn of the crop for the province this year works out at 87 per cent. of the normal against 82 per cent. both in the corresponding and final forecasts of last year.

Condition figure.—The condition figure for the cane crop is estimated at 87 per cent. as against a ten years' average of 82·3 per cent. This means that the condition of this year's crop is equal to about 106 per cent. of the ten years' average.

Director of Agriculture, Bengal.

VI. **Condition of agricultural stock.**—The condition of live-stock was, on the whole, fair. Stray cases of cattle-disease were, however, reported from six districts.

VII. **Failure of pasturage and fodder.**—No insufficiency of fodder was reported from any part of the province.

VIII. **Prices of food-grains.**—During the second fortnight of the month, the retail price of common rice of the cheapest quality fell in ten districts and remained stationary in the rest of the presidency. It varied from 6 seers per rupee at Mymensingh to 10 seers per rupee at Bankura.

IX. **Condition of agricultural population.**—The condition of agricultural population is less satisfactory owing to the fall in price of jute and other staples. Distress was reported from parts of Malda.

Resolution on the Report on the working of the Asansol Mines Board of Health for the year 1929-30.

CALCUTTA, THE 23RD OCTOBER 1930.

RESOLUTION—No. 2797P.H.

Minister-in-charge: The Hon'ble Khan Bahadur Maulvi K. G. M. Faroqui.

Read—

The Report on the working of the Asansol Mines Board of Health for the year 1929-30.

The constitution and personnel of the Board were unchanged during the year.

Eleven ordinary and eight special meetings were held during the year. Two special and one ordinary meetings failed for want of quorum.

2. The total income of the Board including an opening balance of Rs. 71,002 amounted to Rs. 1,86,706-7-10 during the year. The receipts from cess increased from Rs. 1,11,101 to Rs. 1,15,704 during the year, of which Rs. 99,289 was collected from mine-owners, Rs. 12,402 from receivers of royalties and Rs. 4,013 as miscellaneous receipts. The increase in the receipt on account of cess on mines was due to a larger output of coal, while the decrease in the cess on royalty was attributable to the fact that certain sums were written off as irrecoverable and that there was delay in completing the assessment. The total expenditure amounted to Rs. 1,10,195, leaving a closing balance of Rs. 76,512.

3. There were altogether 1,076 cases of cholera with 518 deaths as against 537 seizures with 292 deaths in the preceding year. The total number of cases of small-pox recorded during the year under report was 354 with 42 deaths as against 143 with 13 deaths in the previous year. The number of primary and secondary vaccinations performed during the year was 17,503 and 17,825, respectively, as against 9,667 and 10,161 during the previous year. Pardanashin women and girls were vaccinated and re-vaccinated by the midwives of the Board.

4. There was no case of plague during the year under review, and only 21 deaths from recognised malaria were reported. There was, however, a slight increase in the mortality from fever during the year.

5. There were severe outbreaks of epidemic dropsy in various parts of the Mining Settlement. Leaflets suggesting remedies for the disease were widely distributed among the public.

6. The birth-rate decreased from 28·0 per mille to 27·1, while the death-rate increased from 20·9 to 23·2. The total mortality recorded during the year was 8,934 against 9,225 during the previous year, while the number of recorded deaths rose from 6,896 to 7,644. Cholera and small-pox were responsible for the increase of mortality. The Board took the usual measures for improving the sanitary condition of the Settlement and all possible steps for checking the spread of cholera, small-pox, malaria and other epidemic diseases.

7. There was an increase in the rate of infantile mortality to 145 per 1,000 of births registered against 139 during the previous year. Fifty-one deaths out of 1,209 deaths occurring amongst adult married women were due to child-birth.

8. The Board continued to pay attention to such special measures as anti-malarial investigation, improvement of rural water-supply, medical inspection of school children and delivery of weekly lectures by the Sanitary Assistants in primary schools on hygiene and public health. The midwives of the Board in addition to their specific duties also paid house-to-house visits and delivered simple lectures on the general principles of cleanliness and domestic hygiene to the women of the Settlement.

17. The following restrictions shall apply to the "sale of poisons" included in Schedule I "by dispensing of prescriptions":—

(*c*) A stock register in the form appended to these rules shall be maintained and kept up-to-date but the consumption of poisons in the dispensing room need not be shown on the sale side of the Register but a record of the prescriptions under which poisons are sold shall be preserved for 2 years.

18. Where the sale of poisons included in Schedule I is carried on both by retail and by dispensing by prescriptions, poisons, issued from stock to the dispensary on any day, shall be entered forthwith as one item on the issue side of the register with a note to that effect, provided that the stock so transferred shall not exceed a reasonable quantity. No detailed particulars are, however, required to be maintained in the said register regarding the consumption of such poisons in the dispensary for dispensing purposes.

19. All the restrictions mentioned in rule 16 (*a*), (*b*), (*c*), (*d*) and (*e*) shall apply to the possession for sale and sale of poisons enumerated in Schedule II.

CALCUTTA, THE 16TH OCTOBER 1930.

RESOLUTION—No. 4529Pl.

The existing rules framed under the Poisons Act, 1919 (XII of 1919), which were published with notification No. 4082Pl., dated the 9th November 1925, apply only to the retail sale of poisons and impose no restriction on wholesale sales, except in regard to the labelling of poisons sold to retail chemists. Experience has shown that a better control of the wholesale sale of poisons is desirable and that a clearer definition of the terms "wholesale sale" and "retail sale" is necessary. It has also been found that Schedules I, II and III appended to the rules require revision to enable the licensing authorities to keep a proper check on the possession and sale of poisons.

2. Government, therefore, appointed in August 1929 a Committee to advise as to the lines on which the rules should be revised, so as to remedy the defects noticed. The Committee was constituted as follows:—

Major-General G. Tate, M.B., K.H.S., I.M.S., Surgeon-General with the Government of Bengal.

Lt.-Col. T. C. Boyd, F.R.C.S.I., Chemical Examiner, Bengal.

Mr. N. N. Sen, Assistant Commissioner, Arms Act Department, Calcutta Police.

Mr. Kshirod Lal Mukharji, Additional District Magistrate, 24-Parganas.

Mr. A. G. Lunan, Messrs. Bathgate and Company.

Mr. Hari Dhon Nag, Messrs. B. K. Paul and Company.

3. The revised rules which were drawn up by the Committee have been further revised in accordance with the recommendations of the Commissioners of Divisions and are hereby published for criticism. Some of the important changes are—

(*a*) definition of "wholesale sale" "retail sale" and "sale by dispensing of prescriptions;"

(*b*) imposition of restrictions on wholesale sale of poisons;

(*c*) revision of the schedules of poisons;

(*d*) introduction of a rule as to the labelling of patent and proprietary medicines containing scheduled poisons;

(*e*) entering in the licence granted to a firm or company the names of persons, eligible under the rules, who are authorised by the firm or company to dispense prescriptions containing poisons.

Order.—Ordered that the resolution be published in the *Calcutta Gazette* and be given as wide publicity as possible.

By order of the Governor in Council,

R. N. REID,

Chief Secy. to the Govt. of Bengal (offg.).

(*a*) If the ordinary surplus is insufficient to meet the charges of the proposed loan, the particular steps which the District Board has taken, or has agreed to take, in order to make good the deficiency.

(*a*) The ordinary surplus is sufficient to meet the charges of the proposed loan as explained in (*d*) below.

(*b*) Possible means of increase in the revenues of the District Board.

(*b*) Revaluation of cesses which has been completed lately.

(*c*) A statement of all outstanding loans specifying, in respect of each loan, the date when taken, the purpose (very briefly), the amount, the annual charges involved, and the amount still payable.

(*c*) Nil.

(*d*) Any explanations in regard to receipts and expenditure to show the true financial position of the District Board when such position is otherwise than the ordinary surplus would indicate.

(*d*) The small amount of normal surplus as noted in column 20 of the statement is due to the fact that the income of the Board during the year 1927-28 from "Provincial Rates" was below the anticipated receipts under the head, as the benefit of Cess Revaluation operations was not allowed prior to the year 1928-29. The normal surplus will be appreciably increased on the expiry of the current financial year. Moreover the funds for repayment of the instalments would be available by curtailing the Board's annual allotment for improvement of water-supply from the Board's ordinary income, as larger expenditure would be incurred on this head from the proposed loan and the surplus allotment available from the ordinary income of the Board would be utilised for payment of the instalments as they fall due.

2. The draft will be taken into consideration on or after the 1st December 1930, and any objection or suggestion which may be received by the undersigned through the District Magistrate before that date will be duly considered:—

No. 44Mne.—27th October 1930.—In exercise of the power conferred by section 5 of the Indian Explosives Act, 1884 (IV of 1884), and with the previous sanction of the Governor General in Council, the Governor in Council is pleased to make the following amendment in the rules to regulate the transport and importation of explosives in the port of Calcutta, published under this department notification No. 78 Mne., dated the 10th July 1923:—

No. 45Mne.—1st November 1930.—The following instructions, framed by the Government of Bengal, relating to the grant of permits enabling engineers and engine-drivers, holding ordinary (steam) certificates of competency to act in the corresponding capacity on inland motor vessels, are published for general information:—

Instructions.

The modifications of the Inland Steam Vessels Act, 1917 (1 of 1917), published under notification of the Government of India in the Department of Commerce No. 282-S., dated the 27th March 1926, declare that the provisions of that Act shall apply to vessels propelled by electricity or other mechanical power, except steam, and that in the case of motor vessels the engineers and engine-drivers shall be in possession of motor certificates or ordinary steam certificates suitably endorsed.

The provisions of the Act as they apply to the certification of engineers and engine-drivers are now in force and persons holding certificates valid in inland steam vessels are not entitled to serve in the same grade on

inland motor vessels unless their certificates are endorsed for that purpose.

Section 25 of the said Act requires that an *inland motor vessel having engines of 565* or more brake horse-power shall not proceed on any voyage unless she has as her engineer a person possessing a motor engineer's certificate granted under this Act or a certificate as first or second class motor engineer granted under the Indian Merchant Shipping Act, 1923, or the Merchant Shipping Act, 1894.

Section 26 of the Act requires that an inland motor vessel having engines of 226 or more brake horse-power but of less than 565 brake horse-power, shall have as her engineer a person holding a first class motor engine-driver's certificate granted under this Act or a certificate as an engine-driver of a sea-going motor-ship granted under the Indian Merchant Shipping Act, 1923, or any valid superior motor certificate granted under that Act or the Merchant Shipping Act, 1894.

Section 27 of the Act requires that an inland motor vessel having engines of less than 226 brake horse-power shall have as her engineer a person possessing a second class motor engine-drivers' certificate or any certificate referred to under sections 25 and 26. A proviso to section 27 allows a motor vessel of 40 brake horse-power or under to ply with passengers if the engine-driver has a permit granted by the local Government.

In order to avoid inconvenience to owners in providing qualified engineers and engine-drivers and to provide facilities to enable such persons to perform the necessary qualifying service, the Government of Bengal are prepared to consider applications for the granting of temporary permits enabling engineers and engine-drivers who hold ordinary certificates of competency to act in the appropriate grade on inland motor vessels. The issue of temporary permits will also in certain cases be extended to engine-drivers who have been in possession of permits as drivers of small launches of 40 brake horse-power or under for two years or more. The issue of permits will be subject to compliance with the following conditions, and they will be issued in respect of individual ships only.

The application should be made by the owner of the vessel to the Principal Officer, Mercantile Marine Department, Calcutta District/Nautical Surveyor, Chittagong, at least one week before the permit is required.

The name of the ship should be stated, its official number, if registered, or the builders' number if not yet registered: the name of the engineer or driver should be given, the rank in which he is to serve and the grade and number of his certificate of competency; the extent of his workshop and sea service with internal combustion and steam engines should be indicated and, in particular, the nature and amount of his experience, if any, of the type of internal combustion engines installed in the ship.

The person on whose behalf the application for a permit is made must attend for interview with the Principal Officer, Mercantile Marine Department, Calcutta District/Nautical Surveyor, Chittagong, at the time communicated to him and, subject to the candidate possessing a reasonable knowledge of the working of the engines with which he is to serve, a permit will be issued to him.

If a permit is issued it will as a rule hold *good for a period sufficient to enable* the holder to qualify for an endorsement of his ordinary certificate or to obtain a motor certificate in the case of those candidates who do not possess an ordinary certificate.

If the candidate fails to obtain the motor endorsement or certificate on the completion of the qualifying period, the permit will lapse, unless the Local Government sanction its renewal for a further limited period.

ADDENDA AND CORRIGENDA.

No. 4236F.—8th November 1930.—The following amendments which have been authorised are published for general information:—

The Fundamental and Subsidiary Rules, 1st Edition (Reprint).

Page 50—S. R. 67.—*Insert* the following as an explanatory note under item (3) subordinate to this rule:—

(*i*) A deputation takes place when an additional court is temporarily added to the permanent staff of station in order to assist the permanent officers of the place in dealing with unusual arrears that have accumulated there. Deputation allowance is admissible in this case as the officer moved has been taken away from his permanent post to which he will return in due time and may be reasonably considered to be keeping an establishment in his own station and an additional establishment in the station to which he has been deputed.

A transfer takes place when there is a change in the personnel of the permanent district staff and no deputation is admissible in such cases, even if the transfer is for a short period.

(*ii*) Ordinarily deputation allowances will not be allowed to officers in cases in which they join their duties at the station to which they are deputed before joining the station to which they are permanently attached, *i.e.*, unless the deputation involves an actual change of station and the expenses of a double establishment. Claims not covered by this principle should be referred to the Local Government for orders.

Page 385—Delegation Chapter.—*Insert* the following as a new item against serial No. 31 relating to subsidiary rule 67:—

Nature of power.	Authority to which the power is delegated.
Power to depute temporarily subordinate Judicial officers to hold Court at another station.	High Court in the case of munsifs. Local Government in the case of sub-judges.

A note on the Pupil's materials in the Drawing Class.

It appears (though it is not very clearly put in the syllabus) that work in classes 3 and 4 is in pencil and pastel. In class 4 water colour is introduced.

Pencil work requires a drawing book containing white drawing paper, a decent pencil, a piece of good India rubber, and two or three sharp knives in the class. At present a great deal of the drawing is done in ordinary khatas, with cheap pencils having blunt points, and a wet finger is used as a substitute for India rubber.

Pastel work requires a book of coloured paper, one box of about 10 colours for each child, and a stock of the deeper colours in *dur* or *demi-dur* crayons for general use. These deeper colours are rather more expensive than the usual, costing from 1d. to 6d. a stick; they are unobtainable in India; they have to be obtained from London or direct from Le Franc in Paris. Without these colours it is impossible to give a correct representation of many objects, e.g., the shadows on a leaf or fruit require a deep blue-green which is not contained in the standard boxes of the pupils.

To get good work in water colour it is absolutely necessary that the pupils should use good colours—and the right colours. It is usually considered best for the teacher to have the colours in tubes and to press out small dabs of the colours needed on to the pupil's palette. The ordinary paint boxes sold in stationery shops contain more colours than the child should use, and those of very bad quality.

In short the pencils, pastels and colours must be supplied by the school; not by the individual. This is not only cheaper for the parent, but is also an essential condition of good work.

C. Morrison. Our World of Human Geography.
The World, with fuller treatment of India (Longman's Geographical Series for India, Book II).
F. D. Unstead. The Practical Geography, Parts I and II.
B. C. Wallis. Macmillan's Geography Exercise Book (India).

Ideal Advanced Regional Geography published by the Grant Educational Company, Limited.

*Open only to a candidate, if it is not his vernacular.

The following books are recommended for the use of teachers:—

Blandford. The Rudiments of Physical Geography for the use of Indian Schools.
Frew. A Regional Geography of the Indian Empire (Blackie and Son).
Wallis. The Teaching of Geography (Cambridge University Press).
O'Malley. Bengal, Behar and Orissa, Sikkim (Macmillan and Co.).

The following book is recommended for the use of teachers in connection with the teaching of "Sand Modelling" in the lower class of schools:—

A. F. Frye. The Child and Nature.

[*N.B.*—Every school that intends to undertake instruction in Geography for the Matriculation Examination is required to possess the apparatus mentioned in the following list:—

I. (The total cost need not exceed Rs. 65.)

(1) A measuring tape and metre scale and foot-rule.
(2) A magnetic compass.
(3) Squared paper and tracing paper.
(4) Clay, dry sand, paper pulp for modelling.
(5) A globe not less than 14 inches in diameter, with writing surface, and with line of latitude and longitude and outlines only of the land masses marked upon it.
(6) A map of the school locality on a scale of 4″ or 6″=1 mile.
(7) A map of the district in which the school is situated 1″=1 mile.
(8) A coloured map of the province.
(9) A coloured political map of India.
(10) A physical map of India.
(11) A relief map of India.
(12) A map of the world on Mollweild's equal area projection and a map of Asia.

It is essential that the students should be provided with atlases, or with the necessary hand map, and with a drawing instrument box. Maps for school work should not contain too much detail or be crowded with names.

II. The following additional equipment is recommended when it can be provided, but the lack of it is not to be considered as a bar to the recognition of the school in Geography:—

(1) A thermometer.
(2) A mercury barometer.
(3) A rain-gauge.
(4) A small collection of typical rocks; in particular, those of the province and India.
(5) A small museum of typical products.
(6) A good standard atlas.
(7) Geographical pictures.
(8) Magic lantern and slides.

(1) The attention of teachers is invited to the raised maps of Bengal and Eastern Bengal and Assam made of paper pulp, prepared by Babu Kailaschandra Dutt, Head Pandit, Habigunj Government Girls' School, Sylhet, and sold for Rs. 7 and Rs. 5, respectively.

(2) Globes of all kinds are made by George Phillip and Son, London, W., and A. K. Johnston, London, and Messrs. Ruddiman, London. Small hand globes of German make can be obtained through the Indian School Supply Depot for about a rupee each.

(3) The "Comparative" series of large wall maps of the continents published by George Phillip and Son is good and up to date; so also are the Geographical wall maps published by Edward Standford. Messrs. Ruddiman Johnston publish a series of smaller wall maps which include maps of India illustrating various distributions.

Messrs. Nelson's wall atlases are good. Mr. S. B. Chatterjee publishes District Maps, also ordinary and relief maps of the province.

Babu L. M. Basu, the Drawing Master of the Dacca Collegiate School, has published good relief maps of Eastern Bengal and Assam and of India.

The Vidal-Lablache French wall maps on strong card-board, named on one side, and the same map without names on the reverse, published by Armond Collin, Paris, are good and cheap. They measure 46 inches by 39 inches and can be delivered in Calcutta for Rs. 4-14 each.

(4) The hand-maps, coloured to indicate relief, published by the Diagram Company, West Barnes Lane, New Malden, Surrey, at one penny each, are the best of their kind.

The uncoloured half-penny maps showing river systems and a few towns, published by the same Company, are excellent for class use.

The autograph hand maps, with hill shading in brown, published by Messrs. Edward Standford, London, at one penny each, are very good, and are larger than the Diagram Company's hand maps. The 15″ map of the world on Mollweild's equal area projection is specially to be commended.

(5) Wall pictures of considerable artistic merit are published by Messrs. Edward Arnold of Leeds, Horns Hacbette of Paris, Messrs. Holzel of Vienna, and Messrs. Longmans Green and Company. They cost, delivered in India, from two or three rupees each.

Map lantern slides and view slides specially prepared for Geography teaching are sold by the Diagram Company for two or three shillings each. Mr. Burlington Smith of Darjeeling also sells good picture slides of the Himalayas at Rs. 15 per dozen.]

Elementary Mechanics.

The following books are recommended:—

Simple lever (including brass slotted weight).
Roman steelyard.
Lecture apparatus for experiment on movements.
George's New Atwood's Machine.
Stop watch.
Glazebrooke's apparatus (to demonstrate movement of a body).

Wall Crane.
Becker's New Physical Balance.
Set of gramme weights (200 grams to 1 mgr.).
2 Composition Ivory Balls.

NOTE.—The above list is not exhaustive, and much of it might be replaced by similar forms that could probably be made far more cheaply by any clever mistry under proper supervision. In most cases, however, it will probably be found advantageous to buy such a set as indicated in the list, specially for demonstration purposes, and subsequently to develop simplified duplicates illustrating the same principles, which the boys should be given opportunity actually to experiment with on their own individual account or working in pairs.

Geography.

Books recommended to be used by students in studying the subject in accordance with the syllabus:—

C. Morrison. Our World of Human Geography.
The world with fuller treatment of India (Longman's Geographical Series for India, Book II).
F. D. Unstead. The Practical Geography, Parts I and II.
B. C. Wallis. Macmillan's Geography Exercise Book (India).
A. Bose. Outlines of Geography.
Ideal Advanced Regional Geography published by the Grant Educational Company, Limited.

The following books are recommended for the use of teachers:—

Blandford. The Rudiments of Physical Geography for the use of Indian Schools.
Frew. A Regional Geography of the Indian Empire (Blackie & Son).
Wallis. The Teaching of Geography (Cambridge University Press).
O'Malley. Bengal, Behar and Orissa, Sikkim (Macmillan & Co.).
L. Dudley Stamp. The World. A General Geography for Indian Schools (Longmans, Green & Co.).

The following book is recommended for the use of teachers in connection with the teaching of "Sand Modelling" in the lower classes of schools:—

A. F. Frye. The Child and Nature.

[*N. B.*—Every school that intends to undertake instruction in Geography for the Matriculation Examination is required to possess the apparatus mentioned in the following list:—

I. (The total cost need not exceed Rs. 65.)

(1) A measuring tape and metre scale and foot-rule.
(2) A magnetic compass.
(3) Squared paper and tracing paper.
(4) Clay, dry sand, paper pulp for modelling.
(5) A globe not less than 14 inches in diameter, with writing surface, and with line of latitude and longitude and outlines only of the land masses marked upon it.
(6) A map of the school locality on a scale of 4″ or 6″=1 mile.

(7) A map of the district in which the school is situated 1″=1 mile.
(8) A coloured map of the province.
(9) A coloured political map of India.
(10) A physical map of India.
(11) A relief map of India.
(12) A map of the world on Mollweide's equal area projection and a map of Asia.

It is essential that the students should be provided with atlases, or with the necessary hand map, and with a drawing instrument box. Maps for school work should not contain too much detail or be crowded with names.

II. The following additional equipment is recommended when it can be provided, but the lack of it is not to be considered as a bar to the recognition of the school in Geography:—

(1) A thermometer.
(2) A mercury barometer.
(3) A rain-gauge.
(4) A small collection of typical rocks; in patricular, those of the province and India.
(5) A small museum of typical products.
(6) A good standard atlas.
(7) Geographical pictures.
(8) Magic lantern and slides.

(1) The attention of teachers is invited to the raised maps of Bengal and Eastern Bengal and Assam made of paper pulp, prepared by Babu Kailaschandra Dutt, Head Pandit, Habigunj Government Girls' School, Sylhet and sold for Rs. 7 and Rs. 5, respectively.

(2) Globes of all kinds are made by George Phillip and Son, London, W., and A. K. Johnston, London, and Messrs. Ruddiman, London. Small hand globes of German make can be obtained through the Indian School Supply Depot for about a rupee each.

(3) The "Comparative" series of large wall maps of the continents published by George Phillip and Son is good and up to date; so also are the Geographical wall maps published by Edward Standford. Messrs. Ruddiman Johnston publish a series of smaller wall maps which include maps of India illustrating various distributions.

Messrs. Nelson's wall atlases are good. Mr. S. B. Chatterjee publishes District Maps, also ordinary and relief maps of the province.

Babu L. M. Basu, the Drawing Master of the Dacca Collegiate School, has published good relief maps of Eastern Bengal and Assam and of India.

The Vidal-Lablache French wall maps on strong card-board, named on one side, and the same map without names on the reverse, published by Armand Collin, Paris, are good and cheap. They measure 46 inches by 39 inches and can be delivered in Calcutta for Rs. 4-14 each.

(4) The hand maps coloured to indicate relief, published by the Diagram Company, West Barnes Lane, New Malden, Surrey, at one penny each, are the best of their kind.

The uncoloured half-penny maps showing river systems and a few towns published by the same Company, are excellent for class use.

The autograph hand maps, with hill shading in brown, published by Messrs. Edward Stanford, London, at one penny each, are very good, and are larger than the Diagram Company's hand maps. The 15″ map of the world on Mollweide's equal area projection is specially to be commended.

(5) Wall pictures of considerable artistic merit are published by Messrs. Edward Arnold of Leeds, Horns Hachette of Paris, Messrs. Holzel of Vienna, and Messrs. Longmans, Green and Company. They cost, delivered in India, from two or three rupees each.

Map, lantern slides and view slides specially prepared for Geography teaching are sold by the Diagram Company for two or three shillings each. Mr. Burlington Smith of Darjeeling also sells good picture slides of the Himalayas at Rs. 15 per dozen.]

NOTE.—The above list is not exhaustive, and much of it might be replaced by similar forms that could probably be made far more cheaply by any clever mistry under proper supervision. In most cases, however, it will probably be found advantageous to buy such a set as indicated in the list, specially for demonstration purposes, and subsequently to develop simplified duplicates illustrating the same principles, which the boys should be given opportunity actually to experiment with, on their own individual account or working in pairs.

Minister-in-charge: The Hon'ble Khan Bahadur Maulvi K. G. M. Faroqui.

Read—

Annual Reports of the Civil Veterinary Department, Bengal, and of the Bengal Veterinary College for the year 1929-30.

I.—Civil Veterinary Department.

During the year under review there was no noticeable event of administrative importance. Owing to financial stringency it has not been possible to give effect to the schemes referred to in last year's review, while development on the lines recommended by the Royal Commission on Agriculture and accepted by Government has been indefinitely postponed. Inspite of these depressing conditions, it is gratifying to note that the Director and his staff have accomplished a useful year's work.

2. The year under review was marked by heavy mortality from outbreaks of contagious diseases. Rinderpest again was the most serious scourge, and it will appear from the interesting graph showing the issue and consumption of serum, appended to the college report, that this disease becomes more virulent during the season when the cultivator is most in need of his cattle. For various reasons conditions are not yet favourable for the adoption of measures for the eradication of the disease such as segregation or destruction of infected animals, which have been found most effective in western countries. Consequently this and other contagious diseases have to be fought by the

method of preventive inoculation designed to protect the individual animal. Experience shows that the "serum-alone" method of inoculation though very effective in checking outbreaks of rinderpest is subject to the limitation that it confers immunity for less than a fortnight whilst infection in a particular locality may last for a much longer period. The results are, therefore, incommensurate with the expense incurred and the labour involved from year to year. On the other hand, the "serum-simultaneous" method of inoculation confers long immunity and is now recognised as the standard treatment for rinderpest. Experiments conducted in Bakarganj district have proved that this method can be successfully carried out in local areas by the departmental staff in this Presidency, and it is hoped that the department will be able to extend the use of this method throughout the province.

3. Veterinary aid for the ordinary care of animals in the mufassal is still inadequate. According to the standard of one veterinary assistant surgeon for every 25,000 cattle set by the Royal Commission on Agriculture, no fewer than 1,000 assistants would be required. But even the moderate programme of having two such officers in each subdivision has not been realised, the number (98) now employed being about half the ultimate strength of the staff. Similarly, the less ambitious scheme for the establishment of a veterinary hospital or dispensary in each subdivision is no nearer realisation. Nevertheless, it is gratifying to notice that a number of district boards have evinced interest in constructing or improving hospitals and dispensaries. Private assistance is also forthcoming to supplement the efforts of local bodies in this direction, and Government trust that this interest will be maintained.

4. The local bodies can do much to improve cattle by maintaining breeding bulls in larger number than at present. The existing number of 111 bulls maintained by them is inadequate, but if intensive work is taken up in selected local areas more valuable results can be expected. Castration of scrub and immature bulls is one of the means to this end, but it is reported that only 48 bulls were castrated during the year. This work should receive greater attention from the department.

5. The thanks of the Governor acting with the Minister-in-charge are due to Mr. Kerr for the care and attention which he devoted to the administration of the department. He also notices with pleasure the names of the officers of the department who did good work during the year.

II.—Bengal Veterinary College.

6. The increase in the number of applications for admission from various parts of India and even outside it furnishes a proof of the popularity of the college. The large number of entrants from Bengal itself is an indication of the demand for veterinary education in the Presidency inspite of limited scope for employment.

7. The lengthy report of the Principal contains an interesting record of work in various branches of the college and hospital, a noticeable feature being the development of the agricultural section in which fodder, etc., is successfully grown mainly for the nutrition of the hospital patients. Useful work also continued to be done at the Raymond Research Laboratory.

8. The question of revision of the curriculum of the college was under consideration during the year. Pending examination of the whole question by the Veterinary Committee of the Imperial Council of Agricultural Research Government (Ministry of Agriculture) accepted the recommendation of the Board of Examiners of the college that the existing curriculum should be continued. Government have also approved of the Principal's proposal for the introduction, as an experimental measure, of an extra course of lectures and practical studies in meat and milk inspection, and the fundamental principles of genetics, dairy farming and poultry keeping.

9. Government desire to acknowledge the services rendered by Mr. MacGregor and take this opportunity of recording their appreciation of the work done by Mr. Davis as Vice-Principal and officiating Principal. Mr. Davis has since been appointed to the Principalship of the Veterinary College at Patna.

GOVERNMENT OF BENGAL.

Department of Agriculture and Industries.

Agriculture.

CALCUTTA, THE 4TH NOVEMBER 1930.

RESOLUTION—No. 4975 Agri.

Minister-in-charge: The Hon'ble Khan Bahadur Maulvi K. G. M. Farequi.

Read—

The Annual Report of the Department of Agriculture, Bengal, for the year 1929-30.

The report under review is another record of good work of the Agriculture Department in Bengal, although financial stringency has continued to be a great handicap.

2. **Research and experiment.**—The most noticeable feature of the year was the inauguration of the Bengal Agricultural Research Committee in April last in accordance with the recommendations of the Royal Commission on Agriculture. The main functions of the Committee are to co-operate with the Imperial Council of Agricultural Research in matters connected with the advancement of agricultural and veterinary research and to act as a connecting link between that body and agricultural activities in this Presidency. A great impetus to research has been given by the facilities offered by the central institution, and no fewer than ten schemes were put forward by the Agricultural and Veterinary Departments, the Dacca and Calcutta Universities and the Viswa-Bharati, Santiniketan, for consideration at the first meeting of the Provincial Committee held at Darjeeling in May last. It is gratifying to note that a grant obtained last year from the Imperial Council of Agricultural Research enabled the Dacca University to found an Agricultural Research Fellowship. Grants have also been sanctioned by the Imperial Council during the current year to the University of Calcutta towards the schemes for research into the properties of colloid soil constituents by Professor J. N. Mukherji and into agricultural statistics by Professor P. C. Mahalanabis. It is hoped that the closer association of the Dacca and Calcutta Universities, which are strongly represented on the Provincial Committee, in the work of agricultural research will have valuable results.

Work in all sections at the Central Research Station at Dacca progressed on approved lines. Jute and sunn hemp engaged attention in the Fibres section, sugarcane and tobacco in the Chemical, and paddy, pulses and fodders in the Botanical section.

3. **Demonstration and Propaganda.**—The staff available for demonstration and propaganda is still inadequate, but it is gratifying to note an increasing measure of assistance from local bodies and private individuals. The number of private farms rose to 140 during the year under review, and it is worthy of record that 231 paddy seed farms comprising an area of 1,200 acres are managed by zamindars, talukdars, co-operative societies, union boards and agricultural associations. Sixteen are run by Government estates. These farms supplied 12,000 maunds of seed of approved quality, and it is hoped that these sources of supply will continue to multiply.

4. **Agricultural Education.**—The experimental scheme for the teaching of agriculture in High English and Middle English schools on the Punjab system has now reached an interesting stage. The first batch of teachers under training completed their two years' course at the Dacca school in December last and went back to their respective schools to take charge of the Agricultural classes. Considerable interest attaches, therefore, to these pioneer institutions and their agricultural teachers; and the Government (Ministry of Agriculture) will watch carefully the results. Much depends on the attitude of the parents and guardians of the pupils towards the scheme, but it is hoped that the enlightened views of the newly trained teachers will go a great way towards removing misunderstanding and instilling enthusiasm into the pupils.

The first batch of five youths of the *bhadralok* class who completed their practical training in agriculture at the Faridpur agricultural farm have been provided with accreted *khas mahal* land in that district for cultivation. It is reported that they have made a good start; they have cleared jungle, built houses and cultivated jute and *aus* and *aman* paddy on their holdings. The Hon'ble Minister will watch further developments with great interest.

5. **Agricultural Engineering.**—Administrative approval was accorded after the close of the year to the scheme for the entertainment of additional staff required for the workshop of the Agricultural Engineer. Although the lack of requisite staff was a handicap, the Agricultural Engineer was able to carry out a considerable amount of repair work at his workshop. He has also shown commendable energy in designing improved ploughs and sugarcane-crushing and juice-boiling machinery.

A scheme for a course of training of apprentices at the Agricultural Engineer's workshop has been approved. It is proposed to admit at present six apprentices for an eighteen months' course. The syllabus will consist of practical training in the workshop for twelve months. During the remaining six months they will be employed on the working of oil engines, pumps, cane-mills and ensilage cutters. This scheme will involve no additional expenditure, and it is hoped to give effect to it when the full complement of the workshop staff is sanctioned. Pending introduction of this scheme the Agricultural Engineer has been authorised to train a few apprentices.

6. **Cattle improvement.**—In the cattle improvement programme of the Bengal Agricultural Department the two cardinal principles of evolving a suitable type of animal and of providing nutritious food for cattle continue to be followed. It is gratifying to note that the Second Economic Botanist, who is collaborating with the Live-stock Expert, has been able to obtain promising results with fodder crops. New varieties of fodder grasses such as Sudan grass, Napier grass, etc., have been introduced. Fodder is now grown at most of the farms, and there is already a demand for fodder crop seeds.

7. **Sericulture.**—Inspite of slackness of business owing to the world-wide trade depression and severe competition in the real and artificial silk market, Bengal silk found a ready sale. The Government nurseries produced over 18,000 kahons of seed cocoons, *i.e.*, 1,000 more than in the preceding year, while the selected rearers succeeded in raising and selling over quarter of a lakh kahons. The total receipts from the Government nurseries remained the same as in previous year (Rs. 58,000), but according to the financial statement they worked at a loss of about Rs. 63,000 in both this and in the preceding year. Although the aim of the Sericultural Department is to promote the silk industry in Bengal by the propagation of disease-free seeds of selected strains of silkworm to the rearers from the Government nurseries, the time has now come as the Director points out when new measures must be adopted not only to improve the quality of silk but also to lower the cost of its production. The Government (Ministry of Agriculture) take this opportunity of inviting attention to the need for strict economy in this section and have asked the Director to examine the question of closing down some of the less important nurseries.

The Hon'ble Minister notices with pleasure that the value of co-operation is now understood by those engaged in this industry. In the district of Malda a great advance has been made in this direction. There are about 100 societies working in the district of which 32 with over 500 members are affiliated to the Bengal Co-operative Silk Union, Ltd.

8. **Acknowledgment.**—The Government of Bengal (Ministry of Agriculture) are pleased to record their appreciation of the services of Mr. Finlow. They have also read with pleasure the list of names submitted by the Director of officers and private gentlemen who have rendered valuable assistance towards agricultural and sericultural development. Government also appreciate the co-operation of the non-official gentlemen who served ungrudgingly as members of the Agricultural Board and of the various Committees attached to the Department.
